

How long lasts site creation?

Implementation of the site usually lasts from one day to two to three weeks depending on the complexity of the project. Pages for individual owners performs faster than corporate portals or online shops.

Will I be able to modify the content of the page by myself?

YES, our sites are generally based on a [CMS](#) system which allows you to manage the content as a registered member with assigned appropriate access rights.

Can I change the layout?

YES, but every new skin (template) must be customized to individual needs.

Can you suggest an initial graphic design before I decide?

Unfortunately, we do not do pre-project. We can only indicate the template which can be used for the site construction.

Do you entrust your company to maintain the sites and all the formalities related to the buyout, maintenance and renewal of Internet domain names?

YES, on request we can host your service on our or external servers. We can also take care on all formalities related to the buyout, maintenance and registration of Internet domain names.

Can I fix the design done?

Our company carries out one design with the possibility to switch page elements in any configuration. Each user may install his own template. In the Internet is available around 1000 free templates containing various graphic design for both individual and commercial use.

What is a cost of preparing website?

The price of the website or online store depends on many factors. Each project is priced individually, so please send us the completed [form](#) . After analyzing your idea we will be able to prepare a preliminary quote and we will contact you via email or telephone.
